## Instructions and other information for Camp Lejeune Questionnaire

What factors led to the settlement of your Claim?

### **Presumptive diseases:** (Listed by the VA)

Adult leukemia  
Aplastic anemia and other myelodysplastic syndromes  
Bladder cancer  
Kidney cancer  
Liver cancer  
Multiple myeloma  
Non-Hodgkin's lymphoma  
Parkinson's disease

I am interested in how claims are being settled when claims do not list a presumptive disease. Some diseases are considered *qualified diseases*, where evidence of exposure to the toxic water is not strong enough for the disease to make the presumptive list. Other diseases are *casually linked diseases*, where evidence of exposure to the toxic water as a cause is weak.

Did you have trouble finding an attorney who would represent you if your disease was not on the presumptive list?

What was your outcome if your claim was for a disease not on the presumptive list? What factors led to the outcome of your claim listing a non-presumptive disease?

What advise do you want to give individuals filing a Camp Lejeune toxic water claim?
